Summary

I am a Software Engineering graduate from Universitas Bina Sarana Informatika with a strong interest in front-end development. While my primary focus is on creating responsive, interactive, and user-centric interfaces, I also have a growing interest in full-stack and back-end development. I continuously enhance my skills through self-directed learning from various online resources. Proficient in modern technologies such as HTML, CSS, JavaScript, React.js, PHP, and CodeIgniter, I am committed to delivering innovative web solutions across different layers of development.

Education

Universitas Bina Sarana Informatika
